Joseph Minardi, Editor

The UCHS would like to thank all of those who came out to our Annual Valentine's Tea Award Ceremony on Sunday afternoon. Congratulations to our recipients for their hard work in the neighborhood. Thanks also to those who assisted in the food preparation. A special shout out goes to our Awards Committee (George Poulin and Moira Nadal) for gathering info about contributors to University City improvements, evaluating nominees and creating the actual awards. And an extra special thanks to Ellie and Nick Cernansky for opening up their beautiful home to the UCHS for the event and welcoming dozens of strangers into their house. Here's to a successful 2015 and let's keep up the good work in making University City the premier neighborhood in Philadelphia.

New Mission Statement Voted On at Awards Tea

The revised Mission Statement for UCHS was voted on at the Award Tea, approved, and will be effective as of March 1, 2015.

UCHS HOUSE TOUR PLANNED FOR '15!

With this cold and dreary winter upon us, one can only dream of warmer spring days, with flowers blooming and birds singing. It's also the time when folks get to check out some of the most fascinating houses in University City. Last year we at UCHS held a very successful house tour and this year promises

to be no less eventful. On Sunday, May 31st, 2015 UCHS will be holding its annual tour of the neighborhood. In the next issue of *On the West Side* we will have more details about the tour. We at the UCHS can only hope this year's event will be as successful as last year. And, of course, we hope to see you out there enjoying the beauty of the neighborhood.

Mark your calendar for the 2015 UCHS House Tour.

"YOUR WEST PHILADELPHIA HOUSE" WORKSHOP AT THE WOODLANDS

The UCHS is pleased to announce a joint "how to" workshop project with The Woodlands Mansion on April 12th (2:00 to 4:00 p.m.) titled, "Your West Philadelphia House: How Old is it? Who Lived There?" This event will be fun and informative, and be sure to bring the kids along for coloring and other fun activities! So come along and uncover your house's story!

This workshop will be led by architectural historian **Aaron Wunsch, Ph.D.** Dr. Wunsch is an Associate Professor in the University of Pennsylvania's Graduate Program in Historic Preservation and a West Philadelphia resident.

Cost: Free to members of University City Historical Society or The Woodlands, \$10 for non-members. Make your reservations at:

4224 BALTIMORE MEETING - FEBRUARY 19, 2015

The Spruce Hill Civic Association held a meeting to discuss zoning for 4224 Baltimore Avenue on February 19th. About 45 people braved the frigid temperatures to hear from U-3 Ventures and the design team of Cecil Baker and voice their opinions. The massing of the project, which was arrived at after three public meetings during 2014, was the prime matter of the evening, even though some in attendance were still focusing on parking and other issues, after which things got a little contentious. One local resident stated, "this would be an ornament to our community and that Cecil Baker is an extremely talented architect." Also, "at first I was extremely sceptical but now I'm a convert." Another person said that retail at the corner of 43rd and Baltimore was a "no-brainer." A show-of-hands to gauge the approval of the project was overwhelmingly positive. Failing this the lower density (with no retail) "by-right" design would be built instead. This is now to go to the ZBA for final approval. A date had not been set yet.

GLOSSARY OF TERMS FOR HOMEOWNERS*

Continued from previous issue

Filling

A term used at the end of the nineteenth century to identify carpeting woven in a single solid color.

Floorcloth

A term used through the first half of the nineteenth century to identify a linen, cotton, or jute cloth painted with oil-based paints and commonly used in entry halls and dining rooms, where it sometimes protected better carpeting.

Fresco Paper

Plain or patterned wallpaper used during the middle of the nineteenth century to create the illusion of panels.

Frieze

The area at the upper portion of the wall between the picture rail and the cornice.

Geometric Tile

Floor tiles without pattern produced in a limited number of colors and polygonal shapes. In America, these plain tiles, as well as the patterned ones, were marketed as “encaustic” tiles.

Grass Matting

A product woven in the Orient of various grasses and used as a summer floor covering or as the base for smaller carpets at other times of the year.

Ground

Background color or wallpaper or carpeting.

Hue

A term that designates a color, such as red, yellow, or blue.

Imperial

Another name for three-ply ingrain carpeting developed in Scotland c. 1824.

Ingrain

An American term for a flat-pile, reversible carpet resembling a coverlet, in which the colors of the design on one side are reversed on the other.

Ingrain Paper

A thick, textured wallpaper permeated with color because the pulp is dyed before the paper is made. Ingrain paper was sold in plain and patterned varieties.

Intensity

The purity or saturation of a particular hue.

Kidderminster

Another term for ingrain carpeting denoting the waving center near Birmingham, England, where ingrain was first made in the early eighteenth century.

Lambrequin

A stiffened, unpleated fabric suspended from a cornice above a window and often embellished with cords, fringes, and an ornamentally cut hem.

Leno

A weave in which the warp and weft threads are interlocked, producing a loosely woven fabric suitable for use as windows.

RESTORING MARBLE FIREPLACES

Q: What is the best way to restore a marble fireplace?

A: Before attempting to restore a marble fireplace, make sure that you allow yourself plenty of time. It is certainly not a job to be done in a hurry. A point to remember before you begin cleaning is not to use any acids, dyes or alcohol: marble is a porous substance, and fluids such as these will soak into it and stain, or eventually cause the marble to disintegrate.

There are three main problems to be overcome when restoring marble. First, it is likely to be broken or chipped; second, it may have been painted; and last it may be heavily stained. If you are unlucky you may have to deal with all three!

If the fireplace has been badly damaged - large chunks have been broken off the mantel ledge, for example, or slabs have fallen off the mantel face - then you may have to break apart that part of the mantel-piece and start from scratch, gluing together sections with special marble glue. For that you will need a stone chisel and ballpeen hammer to chip away ragged edges and to pry off discarded pieces. You may have to replace parts with new marble, your local marble dealer will help to supply matching pieces. Always protect your hands with heavy-duty,

leather-lined workgloves.

You can remove paint from marble by using special paint stripper formulated for stone. Work on only a few square inches at a time, using swabs of cotton wool to take off the excess stripper. Repeat this until the paint disappears. It is essential to wear rubber workgloves during this process. If you are careful, you can use a paint scraper, but remember that marble scratches easily.

When polishing marble, use a white hard polish: any coloring in the polish will stain. Rub the polish hard into the marble using a soft white cloth. Any dye in the cloth could seep into the marble. For a matt finish use a softer cloth.

After a long and laborious restoration, it is important to look after the marble. For day-to-day upkeep use a white furniture polish to keep it clean. Remember that marble is a porous stone, and careless placement of plant pots and glasses will cause staining.

PROFILES IN ARCHITECTURE

Robert A. Pitts

Robert A. Pitts is one of the lesser-known, but still important architects that shaped University City during the late nineteenth century, mainly due to his prolific work in this part of Philadelphia. Pitts graduated from the Pennsylvania Academy of Fine Arts and became a working architect by 1889. By 1890 his projects begin to appear in the *Philadelphia Real Estate Record and Builders Guide*, and the 1891 Philadelphia city directory notes that he operates out of an office at 224 South 3rd Street, an address in which he remained through 1905, adding a real estate office from 1903 to 1905 at 6151 Vine St.

Pitts remained active as a Philadelphia architect/real estate developer until 1936.
